

Imperial Toys Body Billboards

Battery replacement

The Imperial Toys™ Body Billboards™ unit requires a CR2032 Lithium “coin cell” battery, and is inserted into the unit, via the included battery caddy, as show below...

This is done, as shown, with the unit face down. Note the latch of the battery caddy is oriented on the right side, and the battery oriented with the positive (+) side facing you.

If all is well, and you’ve inserted the battery correctly, the word “HELLO” should start to scroll across the screen at low speed, and the name “BODY BILLBOARDS” should scroll across the screen, when you press the “Try me” button.

Imperial Toys Body Billboards Programming

Programming and control of the Body Billboards™ unit is accomplished by a set of seven buttons on the back...

ON/OFF

Pressing this button will cycle the unit between power on, and power off modes.

SPEED

Pressing this button will cycle the unit between the 5 available scroll speeds

CANCEL

Pressing this button will cancel the current operation, during programming.

DOWN

Pressing this button will move to the previous character in the character set.

UP

Pressing this button will move to the next character in the character set.

SET

Hold momentarily to start or stop programming, or one quick click to set the selected character, adding it to the message.

TRY ME

As seen in the battery replacement data, pressing this button will display the phrase "BODY BILLBOARDS" on the screen, with a quick scroll speed.
